Wheat News Is Generally Favorable to the Selling Side, and Corn Weak on Estimates.

Trading in the local grain market was very light Saturday and interest was confined to scalpers and small operators, most of whom were eager to cash their lines and take small profits over Sunday. Most of the market news was mildly bearish. Official estimates of the 1903 crop indicated the market, and the movement to Western markets continued brisk. Cables were lower for wheat.

Irish crop statistics and a general disposition to liquidate were the features of an extremely dull corn market. Receipts were light and cables were slightly higher.
